

FOR IMMEDIATE RELEASE

Team Cymru Launches Network Intelligence Portal

New online tool enables Network Administrators to see crime on their networks.

Burr Ridge, IL - Oct 23rd 2010 - A Chicago based IT Security Research company today launched a new tool that shows what's happening on a network whilst integrating industry leading data about malicious activity.

TC Console is specifically for those responsible for network security: basically, those who can take action based on the insight it provides.

It is offered as a community effort. The richness and value of the data is made possible by contributions from the community in order to ultimately benefit the community. Therefore, those wishing to enjoy the benefits of TC Console should expect to contribute to further enhance the service. Those contributions include bandwidth, hosting, data from Darknets and other sources. Other contributions will be considered, so please give us a call.

There really is no more complete and valuable source of critical information to help you protect your network and your users.

To see the tool in action, see <https://www.team-cymru.org/Services/TCCConsole/> and <http://www.youtube.com/teamcymru>. Potential users can e-mail outreach@cymru.com for details of the application process to get a TC Console account, and applications can be made at www.tcconsole.com.

About Team Cymru

Team Cymru is a leading Internet security research think tank that was founded in 1998. Its mission is to make the Internet more secure, more aware, and more reliable. By researching the 'who' and 'why' of malicious Internet activity worldwide, Team Cymru helps organizations identify and eradicate problems in their networks. The group's main office is in the Chicago, IL, US area.
